

Sriram Pothumani

Full-Stack Developer · Node.js · TypeScript · React

SUMMARY

Full-stack developer with 4.5+ years at Runcode Software Solutions building and running production platforms for fleet leasing, rental and corporate vehicle sharing. Backend-heavy across Node.js/TypeScript microservices, MongoDB, PostgreSQL and Kafka, with React/Next.js admin portals. I own billing and invoicing engines, ZATCA e-invoicing, Epicor ERP integration, and release and multi-client deployments on Kubernetes.

EXPERIENCE

Full-Stack Developer · Runcode Software Solutions

Full-time

Feb 2022 – Present

Hyderabad, India

Fleetable: fleet leasing & rental ERP

- Core billing API: invoicing events, contracts, collections and refunds across payment modes, cash registers, bank deposits, settlements and accruals.
- Built the ZATCA (Saudi e-invoicing) library: UBL XML generation, cryptographic signing, QR codes, BR-KSA validation fixes and POS invoice numbering.
- Epicor ERP integration: auto-posting of invoices, collections and refunds, fiscal-period handling, Kafka consumers and retry jobs.
- Shared service modules (approval workflows, idempotency, round-robin assignment) used across the microservice estate; payment-gateway callbacks and promo codes.
- React web-portal screens for approvals, collections/refunds, bank accounts and ZATCA credit/debit notes.
- Own release versioning, Docker/pipeline updates and multi-client deployments on Kubernetes (GKE), plus production data fixes and ops scripts.

Check N Share: corporate vehicle-sharing & booking platform

- One of the original builders; contributed to nearly every microservice (Molecular + TypeScript, Sequelize on PostgreSQL/PostGIS).
- Contract lifecycle: bookings and advance bookings, overlap checks, force-close, no-show and auto-cancel, cost calculation.
- Largest contributor to the Next.js admin control panel and the API gateway.
- Telematics and vehicle commands (lock/unlock), geofences and parking polygons, damage checklists with email and push notifications.
- Multi-tenant roles & permissions, activity logs / contract flow history, announcements and Cube.js reporting.

Full-Stack Developer (Apprenticeship) · GUVI Geek Networks, IITM Research Park

MERN stack

May 2021 – Dec 2021

Chennai, India

- Built full-stack MERN projects, including an Amazon clone (Firebase auth, orders, Capacitor APK), a Netflix-style trailer app (TMDB API) and a real-time messenger (Pusher).

Senior Business Developer · Sakthi Solutions

Point of Sale software

Jul 2019 – May 2021

Chennai, India

- Joined as software & technical support executive and grew into business development: POS software sales, testing, installation and project coordination.

- Back-end transaction processing for mutual funds as a registrar & transfer intermediary.

SKILLS

Languages	TypeScript, JavaScript (ES202x), HTML5, CSS3, SQL
Backend	Node.js, Moleculer microservices, Express, REST/OpenAPI, Kafka, Redis
Data	MongoDB, PostgreSQL / PostGIS, Sequelize, Cube.js
Frontend	React, Next.js, Bootstrap, Material-UI
DevOps & Cloud	Docker, Kubernetes (GKE), Azure (DevOps, Artifacts, Blob), AWS S3, Git, CI/CD pipelines
Domain	Billing & invoicing, ZATCA e-invoicing, Epicor ERP integration, approval workflows, multi-tenant SaaS, telematics

EDUCATION

B.Sc. Information Technology · MTNC, Madurai

MERN Stack Development · GUVI Geek Networks (IITM Research Park), 2021
